

Longyearbyen recycling station

Main goal waste handling:

- Waste in Longyearbyen must be handled in such a way that Longyearbyen appears as a worthy gateway to one of the world's best-managed wilderness areas.
- In terms of resources and the environment, waste management in Longyearbyen must be at least as good as on the mainland

A large white and blue National Geographic icebreaker ship is docked at a pier. The ship has multiple decks with windows and balconies. The text "NATIONAL GEOGRAPHIC" is visible on the side of the ship. In the foreground, the view is from the perspective of someone operating a piece of machinery, likely a forklift or similar vehicle, as evidenced by the steering wheel and control levers. A blue metal container is visible in the lower left foreground. A chain-link fence runs along the pier. The background shows a snowy mountain range under a blue sky.

**Thank you
and good luck for the season!**
